Definition of Done Criteria

Product Name: Backtesting Engine, Team Name: Simple Strategies
Date: 10/25/25

- Code pushed into repository in its own branch (Github)
- Code peer reviewed for standards compliance. These *may* include:
    - Readability
    - Comments where needed
    - Style consistency
    - no major merge conflicts
- External/Public API documented, sufficient documentation
- Unit test definition complete
- Unit tests run without error
- Non-functional tests (e.g. usability, performance) passed
- For User Stories Code committed in an isolated branch. Code passes peer-review for:
    - Readability
    - Clear structure
    - Style-guide adherence
    - Minimal, purposeful comments
    - No major merge conflicts
- External/public API documented where relevant.
- Unit tests defined and implemented.
- All tests run without failure.
- Non-functional checks completed (usability, responsiveness, basic performance). The feature demonstrates correct behavior in the developer's local environment.
- For Sprints
    - All user stories satisfy the User-Story DoD.
    - Sprint build runs cleanly.
    - Team review completed.
    - Demo prepared.
    - Backlog refined for next sprint.
